EXPERIENCE

Maxx Potential – Apprentice Developer

June 2018 - PRESENT

Content Migration from EpiServ to Sitefinity
- Gained proficiency with Sitefinity Content Management System
- Mirrored style of original site using Bootstrap classes
- Simplified CSS by using the Bootstrap framework
- Implemented Javascript for feature adds e.g. dynamically adding content, performing url encoded ajax requests

Sole developer building web dashboard to perform CRUD operations against backend API
- Furthered proficiency with React.js
- Built frontend using MaterialUI to match mockups and prototypes that were provided by the client
- Created forms with input validation
- Built dashboard to be responsive based on screen size
- Conditionally rendered information based on data from API
- Developed highly reusable Higher Order Components to compose new components together as needed
