I am a former Systems Engineer who has been consulting as a Technologist/Web Developer for over a year now. I'm interested in finding a position as a Developer so that I can further my understanding of standards within the industry to ultimately become a better developer.

EXPERIENCE

Consultant – Technologist

October 2016 - PRESENT

Highly focused on customer service and relieving the technological burden from my clients. I build, configure and modify web solutions with the primary goal of helping my clients' business succeed.

Sklar Technology Partners — Sr. *Systems Engineer*

November 2014 - February 2017

Configured server and network infrastructure so that business leaders could focus on running their business instead of managing their technology; Provided daily support to multiple clients; Managed and maintained systems (e.g. Linux Server, Microsoft Server, Microsoft Desktop, Cisco ASA Firewall, end user software)

Allied International Credit — IT *Systems Administrator*

December 2011 - October 2014

Microsoft Systems Administrator; Maintained Servers and Desktops; Managed Cisco Routing and switching in US branch offices; Citrix XenApp Administrator; Supported 1000+ users between US, Canada, and the Philippines

Ektron, Inc. — *Web Specialist (contract position)*

February 2011 - April 2011

HTML; CSS; Content Migration; Built Navigation Hierarchy between sites; Wrote scripts to monitor health and performance of servers

Freelance — *Graphic Design*

February 2009 - January 2011

Logo Design; Web Design; Vector Graphics
